the Power to Achieve!**

Fire Alarm Systems and Service

A fire at your business can have a significant economic impact on your business as well as your community. A poorly designed fire alarm system can result in the same catastrophic consequences as no system at all. Likewise, a system that is not adequately maintained can be equally disastrous. Tri-M has the knowledge, skill-set and certifications to ensure that your systems are adequately designed, installed, inspected and/or maintained to provide you peace of mind of knowing you are protected. We are an authorized dealer for Gamewell Systems, as well as other life safety and security products, integrating fire alarm, audio, security and access control functions.

System Types

- ◆ Local, auxiliary, remote and proprietary
- ◆ Conventional and addressable (analog and digital)
- ◆ Single-stage and two-stage systems
- ◆ Single to three-channel voice communication
